To manage and plan more 500 commercial aircrafts

Initiative & Plan

Raise new voice as a boutique jet operator which is relatively low-key within the private jet industry. In the APAC region, there are few global operators with long history as well as some local operators. As a leader of Hongkong Jet, a Hong Kong-based boutique jet operator, I would like to make different voice heard in order to drive the continuous growth of the entire private jet industry.

With the COVID, the corporate business aviation has been dramatically affected because of the travel restrictions and economic downturn. If I could be a member of the BoDs in AsBAA, I would like to explore more opportunities and gain some support by various governments and society parties to make the industry recovery faster.
