

Dear AsBAA Team,

Please find attached my application and supporting documents for my nomination to the AsBAA Board of Directors.

My submission includes:

- Formal Letter of Nomination
- CV
- Professional Headshot

I am pleased to put myself forward for the opportunity to serve on the AsBAA Board and contribute to the continued development of business aviation across Asia.

If elected, my key focus will be to strengthen the voice and representation of Southeast Asian operators within AsBAA and to help bridge the gap between business aviation markets across Asia.

My proposed priorities and initiatives would include:

1. Strengthen the Voice of Southeast Asian Operators

Provide stronger representation for Southeast Asian operators within AsBAA and ensure that the region's opportunities, operational challenges and regulatory issues are effectively represented at the regional level.

2. Bridge North and Southeast Asia

Build stronger connections between the business aviation communities of North Asia and Southeast Asia, creating greater opportunities to exchange operational experience, regulatory knowledge and market insights.

3. Promote Two-Way Transfer of Best Practices

Encourage the sharing of proven practices in areas such as safety, FBO and ground handling, aircraft management, MRO, airport development, customer service and regulatory compliance — from North to South and equally from South to North.

4. Build Operator-to-Operator Knowledge Sharing

Create more opportunities for practical engagement through working groups, workshops, site visits and operational exchanges, allowing members to learn directly from one another.

5. Support Emerging Business Aviation Markets

Use the collective experience and knowledge of AsBAA members to support developing markets as they establish their business aviation infrastructure, regulations, operating standards and service capabilities.

6. Build a More Connected Asian Business Aviation Community

Encourage greater cooperation among operators, airports, regulators, OEMs, FBOs, MROs and other industry stakeholders so that Asian business aviation can develop as a more connected regional ecosystem rather than as individual markets working independently.

Having worked across both commercial and business aviation and being actively involved in aviation development across multiple Asian markets, I hope to bring a practical operator's perspective to the Board.

My objective is simple: **to give Southeast Asian operators a stronger voice, bridge the gap between markets, and encourage a two-way flow of knowledge and best practices that can help raise the standard of business aviation across Asia.**

I recognize that serving on the AsBAA Board is both a privilege and a responsibility. If I am fortunate enough to be given the opportunity to serve, I would be grateful for the trust of the AsBAA membership and would do my very best to contribute my time, experience and energy to support the Association and our industry.

Regardless of the outcome of the election, I remain committed to supporting AsBAA and its efforts to advance business aviation across the region.

Thank you very much for considering my nomination. I sincerely appreciate the opportunity.

Best regards,

Natthapatr Sibunruang (Pat)

Chief Executive Officer
