

Proposal and Initiatives

Here is my proposal and initiatives plan once I get elected to be a BoD member for this term again:

1. Promotion

Continue to promote AsBAA in different regions, including active engagements with different members, potential members and the industry.

2. Membership

Membership is always a priority for the association, and it will be very critical role for BoD members – how to lead the team and work together with other BoD members to attract more members to join AsBAA.

3. Activities

To build the platform and network for the whole industry, especially for our members, to get more interactions with governments, industry, media and public, such as typical Safety Day, Chapter Meeting, Special Topic Meeting, Cocktail Reception, and other type of activities to get networking.

4. Discovery

Work with aviation related universities, high school and primary schools to get broader translation and knowledge sharing for education of young generations with focus on general aviation and business aviation.

5. Voice of the industry

On behalf of the industry to raise the awareness of the situation for development or restrictions, and to seek for solutions from government, industry and public.

6. Advocacy

To advocate for business aviation development and safety, as well as any challenges faced by the operators, OEM, FBO, Training, ground handling, visa, etc.

7. Contribution

Continue to contribute time and financial support for AsBAA operations, strategic planning and implementations.
